

TECHNICAL INFORMATION TECHNIQUE

79 - 7320 SYNTHETIC R&O HYDRAULIC & TURBINE OIL (NON EP)

is a universal hydraulic and (steam/gas) turbine oil designed for use in most industrial applications. **7320** is formulated to resist high operating pressures without oil film breakdown, ensuring optimum lubrication at all times.

The inherent wetting and penetrating properties of the **7320** will prevent seals from drying and leaking.

is formulated WITHOUT zinc and therefore can be utilised with silver-plated pumps or gearboxes.

Performance Benefits:

- Surpasses US Steel 126
- Denison HF-1
- Cincinnati Mil. P-38 , 45, 54, 55, 57 , 62
- DIN 51524 Part 1
- MIL-L-17 67 2C
- AFNOR E-48 600 HL

Applications:

- Circulating oils
- Rock drill oils
- Gear oils
- Mist oils
- Turbine oils
- Heat Transfer Oils

Application Benefits:

- Outstanding thermal and oxidative stability
- Low copper activity
- Excellent rust protection
- Good hydrolytic stability
- No deleterious effect on demulsibility
- No deleterious effects on antifoam characteristics
